

PROSPECTIVE (2011) PRODUCT CONTENT LABEL¹

The product is sold in blocks of 150 kilowatt-hours (kWh). The product will be made up of the following renewable resources.

| Green-e Energy Certified New ² Renewables in Snapping Shoals EMC Green Power Program | | Generation Location |
|-------------------------------------------------------------------------------------------------|-------------|--------------------------------------|
| -Biomass | 100% | Fayette and Taylor Counties, Georgia |
| -Geothermal | 0% | |
| -Eligible hydroelectric ³ | 0% | |
| -Solar | 0% | |
| -Wind | 0% | |
| TOTAL | 100% | |

1. These figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year.

2. New Renewables come from generation facilities that first began commercial operation on or after January 1, 1997.

3. Eligible hydroelectric facilities are defined in the Green-e Energy National Standard (http://www.green-e.org/getcert_re_stan.shtml) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org); facilities that are run-of-the-river hydropower facilities with a total rated nameplate capacity equal to or less than 5 MW; and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying Snapping Shoals EMC includes: Coal (49.53%), Nuclear (27.64%), Oil (0%), Natural Gas (2.0%), Hydroelectric (4.22%), and Other (16.61%).

The average home in the United States uses 900 kWh per month. [Source: U.S. EPA]
